

HOLST DESIGN + BUILD - ENVIRONMENTAL MANAGEMENT & SUSTAINABILITY POLICY

Holst Design + Build seeks excellence in every aspect of our business and is committed to minimising the environmental impacts of our business operations.

Holst Design + Build is committed to:

- Design and construct residential and commercial buildings integrating environmental elements that enhances the environment rather than imposing on its surrounds.
- Continuously improving environmental performance and integrating environmental best practices into our operations.
- Developing and implementing high quality environmental standards procedures in accordance with the expectations of the client and complying with Environmental Authorities.
- Recognising the impacts on the environment in the construction industry that relates not only to the process of construction but also to the design and subsequent use of buildings constructed.
- Applying sustainable development principles to all facets of the construction process and minimising the impact on, and pollution of, the environment during the construction process.
- Managing risks for work activities to minimise impacts on the environment.
- Ensuring environmental awareness and encourage respect for the environment by all staff, subcontractors and suppliers.
- Giving due consideration to environmental issues and energy efficiency of our building projects.
- Complying with all relevant environmental legislation and regulations.
- Implementing, maintaining and continuously improving our Environmental Management Systems.
- Planning our work to utilise products and materials in such a way as to minimise environmental impacts in production, use, disposal, construction and demolition.
- Taking active interest in the prevention of pollution (noise, air and ground) through the adoption of processes, practices, materials, equipment and products that avoid, reduce or control pollution.
- Ensuring employees, contractors, consultants, clients and the like are made aware of these responsibilities and are educated with regard to the practical application of our Environmental Policy.
